EDGE BAND

ANTI SCRATCH ACRYLIC LAMINATE

WITH AMAZING FEATURES TO STAY LONGER IN YOUR INTERIOR

DURABILITY

Skytouce Acrylic Laminate is highly durable & hard-wearing.

RESISTANCE TO WATER & HEAT

Skytouce Acrylic Laminate is water proof and resistance to heat & changing weather.

RESISTANCE TO SCRATCH

Skytouce Acrylic Laminate is excellent scratch resistance properties.

PREMIUM FINISH

Highly reflective surface with a mirror-like sheen that retains its color & brightness over the years.

LOW MAINTENANCE

Since Skytouce Acrylic Laminate is anti scratch so it possesses very low maintenance. Just a normal wipe with clean cotton cloth is needed to clean it up.

PREMIUM APPEARANCE

Gives the surfaces a super glossy, sophisticated appearance.

Why Us?

We have decided to break all the barriers to design your
DREAM HOME

Skytouche Laminate founded in 2024 is a dynamic and innovative company specializing in the manufacturing and distribution of premium acrylic laminate sheets. Our operational Headquarter and production house both are located in New Delhi.

At Skytouche Laminates, we pride ourselves on blending cutting-edge technology with creative craftsmanship. Available in a wide range of colors, textures, and finishes, our products are designed to inspire creativity and elevate spaces. We prioritize Sustainability by adopting eco-friendly manufacturing processes and sourcing responsibly, ensuring that our products not only enhance aesthetics but also contribute to a greener planet.

Since its inception Skytouche Laminates has quickly established a strong foothold in the Indian market, with plans for international expansion. We believe in developing large dealer network in India. Skytouche Laminate has left its footprints around our Country. With a focus on quality assurance incorporating the latest design trends, materials and technologies. Skytouche Laminates conducts rigorous testing for heat, stain, and scratch resistance to ensure product reliability.

FAQs

HOW TO APPLY SKYTOUCHE ACRYLIC LAMINATES ON INTERIORS & FURNITURE

Use balancing sheet on backside.
Always clean the dust particles properly from the substrate (Plywood MDF, Particle Board) surface by cloth or soft brush.
Always use good quality branded PVC adhesive to stick Acrylic Laminate on substrate. Please don't add water in adhesive before using it.
Spread the adhesive uniformly by brush, roller or adhesive spreader on Acrylic Laminate and base substrate (Plywood, MDF, Particle Board).
It is very necessary to remove the air between Acrylic Laminate and substrate. Please leave minimum 2mm of groove between two pieces of Acrylic Laminate.
At the of pressing Acrylic Laminate on base substrate (Plywood, MDF, Particle Board) always use soft pinch roller or normal pressing technique to protect surface from any damage.
The pressing should be done from the middle of the panel and move towards to the sideline and corners of the panel.
For better bonding of Acrylic Laminate on substrate, press it for minimum 12 to 15 hours.
Peel off the protective film within 15 days of installation.

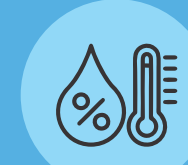

WAYS TO KEEP SKYTOUCHE ACRYLIC LAMINATE NEW FOREVER

Follow some steps mentioned as below to maintain Skytouche Acrylic Laminates.
To clean the surface of Acrylic Laminates do not use thinner.
Wipe the surface gently with a non-abrasive cloth.
Avoid the use of abrasive liquid cleansers, bleaching compounds or solution these may damage the surface of the laminates.
Use mild house hold glass cleaner like COLIN to remove more stubborn stains.
You can use normal water also for cleaning.
Do not place hot cookware directly on the Acrylic Laminate.
Always store Acrylic Laminates at temperature below 300 Celsius.

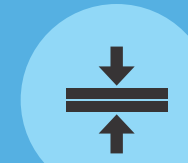

WAYS TO PREVENT SKYTOUCHE ACRYLIC LAMINATES FROM COLOR FADE OR YELLOWING

Do not expose your Acrylic Laminates furniture to direct sunlight, it may cause discolouring, fading and yellowing of the laminates.
Don't use inferior quality chemical dipped plywood as it can react with adhesive which may cause yellow patches after the installation.
Don't use synthetic rubber adhesive for bonding as it may lead to brown/ colored patches on Acrylic Laminates.
Don't place hot cookware directly on the Acrylic Laminates.
Prolong exposure of Acrylic Laminates above 30-degree temperature should be avoided.

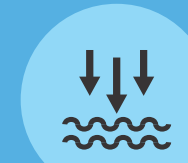

YOU CAN AVOID PROBLEMS LIKE AIR BUBBLE & DELAMINATION ACRYLIC LAMINATES.

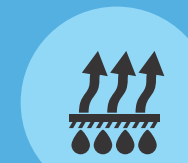

Avoid the lamination process of Acrylic Laminate under high humidity environment.

Insufficient or lack of pressing during the bonding period of Acrylic Laminate.

Don't use uneven surface substrate (Plywood, MDF, Particle Board) that may lead to air vacuum and air bubble which may appear after the installation.

Prevent the base substrate (Plywood, MDF, Particle Board) to absorb moisture. Because after few days of installation, it gradually loses moisture and this resulting in air bubble formation between Acrylic Laminate and substrate.

Don't use the water base synthetic resin adhesive any other the PEVA (Polyethylene Vinyl Acetate Co-polymer)

Take extra care during use of big size acrylic laminate for panelling because due to the bigger surface area, improper lamination may lead to air bubble formation after installation.

DISCLAIMER

The Products are tested to be reasonably free of defects, and when used and fabricated properly they will comply with the applicable manufacturing specifications within realistic deviations. We recommend customers to inspect products properly before installing.

Product's warranty in no way covers defects and non-compliance from or otherwise attributable to any other causes, including, without limitation the following:

- Improper handling / transportation / storage of Skytouce Acrylic Laminates
- Improper installation of Skytouce Acrylic Laminates
- Improper or unintended usage of Skytouce Acrylic Laminates
- Lack of or improper maintenance of Skytouce Acrylic Laminates
- Exposure to high temperatures
- Unauthorized alteration to the products
- Outdoor applications
- Do not use plywood with high moisture content
- Do not use ply with uneven surface
